

Department of Biostatistics
Monthly Seminar Series

Thursday, April 12, 2018

11:00am – 12:00pm

Erma Byrd 301

Speaker:

Niel Infante, MA, MS, MSc
Lead Bioinformatician, Biostatistics

Topic:

Bioinformatics: What it is and what it can do for you

Abstract:

Presentation will include how changes in Biology research have demanded new techniques for data management and analysis. At the same time, changes in Computer Science have allowed Biologists to answer questions they could not ask before. Will also include what has been included in the speaker's 30 years in this field, as well as his recent months with the SPH Department of Biostatistics.
